

### III. Useful references for coral reef rehabilitation through active restoration measure (Compiled by M. Omori)

The references are classified into the following 15 topics.

1. Planning a reef rehabilitation project and management	44
2. Technique of reef rehabilitation: Introduction	45
3. Rearing of coral larvae and juveniles using sexual propagation and outplanting	46
4. Larval settlement and metamorphosis	47
5. Transportation of coral larvae, juveniles, and adult colonies	48
6. Transplantation of coral fragments	49
7. Asexual rearing of coral fragments in nursery and outplanting	52
8. Coral translocation	54
9. Gardening plan of coral community	54
10. Substrates, artificial reefs, seafloor stabilization, and method for attachment of corals	54
11. Electrochemical method	57
12. Effect of grazing and nibbling by invertebrates and fish on corals. Biological control of fouling organisms. Predation exclusion experiment	58
13. Acquisition of symbiotic dinoflagellates by coral spats	59
14. Genetic diversity and connectivity	59
15. Cost and benefit of coral reef rehabilitation	59

Author index

#### 積極的なさんご礁修復再生事業のために役立つ参考文献集（大森 信 編）

参考文献は以下の 15 項目に分けた。著者索引は全ての文献について主著者名のみを表記し、それらの分類項目を番号で示した。

1. さんご礁修復事業の展開と管理	44
2. さんご礁再生修復技術概論	45
3. 有性生殖を利用したサンゴ種苗生産	46
4. 幼生の着生と変態	47
5. 幼生と稚サンゴと大型群体の輸送	48
6. 断片移植	49
7. 無性生殖を利用した種苗生産と植え付け	52
8. 移設	54
9. 造園計画	54
10. 基盤・人工礁・海底整備などの効果と断片や種苗の固定方法	54
11. 電着技術	57
12. 魚類や無脊椎動物によるサンゴの食害および基盤繁殖生物の除去、保護網の利用	58
13. サンゴ幼生や稚サンゴによる褐虫藻獲得	59
14. 遺伝的多様性と種の分布（幼生拡散）に関するもの	59
15. 費用対効果	59
